SUMMARY

Senior IoT student at Princess Nourah University combining expertise in building comprehensive IoT systems and ML data analytics with a solid foundation in network security. Actively seeking a Cooperative Internship (Co-op) to apply my hardware-software integration skills toward developing scalable, secure, and data-driven solutions.

EDUCATION

Bachelor of Science in Internet of Things (Joint Program: Information Technology & Electrical Engineering) 08/2023 – Present
Riyadh, Saudi Arabia
Princess Nourah University
GPA: 4.99 / 5.00
- Achieved placement on the Dean's List at the College of Computer and Information Sciences, and maintained this standing for two consecutive academic years.
Expected Graduation: June 2027

PROJECTS

SmartRide: University Bus Management System 08/2026 – Present
Senior Graduation Project (Conceptual Phase)
Developing an IoT transit framework integrating real-time tracking, route optimization, live ETAs, automated student attendance, and scheduling to streamline daily bus commutes.

Edge-to-Cloud IoT Framework for Smart Agriculture 11/2025 – 12/2025
Architected a hybrid IoT pipeline combining deployed Fog/Edge nodes for local data processing with a comprehensive AWS Cloud blueprint for scalable ingestion and ML analytics.

FloraSense: Smart Plant Monitoring System 04/2025 – 05/2025
Engineered an automated IoT monitoring system using Raspberry Pi and Python, featuring filtered sensor data processing, threshold-triggered irrigation, and real-time Telegram alerts.

EXTRACURRICULAR ACTIVITIES

Cybersecurity Content Creator & Technical Facilitator 08/2024 – 05/2025
Cybersecurity Club @ PNU
- Developed educational content on cyber threats and mitigation strategies.
- Facilitated interactive coding sessions to simplify programming fundamentals.

SKILLS

Programming & Databases: Python, C++, Java, SQL.
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn.
Hardware & Electronics: Circuit Design, Sensor Integration, Arduino Uno, Raspberry Pi.
Networking & Cybersecurity: Routing & Switching, IoT Protocols, Intrusion Detection, Threat Mitigation.
Technical Tools: MATLAB, Simulink, ThingSpeak, Google Colab, Cisco Packet Tracer, Wokwi.

CERTIFICATES

CompTIA Security+: August 2026
Cisco Networking Academy CCNA (Academic Course): December 2024

LANGUAGES

Arabic: Native, English: STEP (91/100)
