SUMMARY

Senior IoT student at Princess Nourah University, skilled in developing smart embedded systems, networking, and sensor data analytics. Actively seeking a Cooperative Internship (Co-op) to apply my expertise in hardware-software integration and data-driven IoT solutions.

EDUCATION

Bachelor of Science in Internet of Things (Joint Program: Information Technology & Electrical Engineering)
Princess Nourah University
GPA: 4.99 / 5.00

- Achieved placement on the Dean's List at the College of Computer and Information Sciences, and maintained this standing for two consecutive academic years.
- Successfully completed 110 credit hours, currently holding Senior standing.

Expected Graduation: June 2027

Present
Riyadh, Saudi Arabia

PROJECTS

SmartRide: Integrated Transit System
Senior Graduation Project (Conceptual Phase)
Proposing an IoT transit platform with real-time tracking, schedule-based morning ticketing, and automated evening ID verification to optimize university bus routing and streamline boarding.

08/2026 – Present

Edge-to-Cloud IoT Framework for Smart Agriculture 
Architected a hybrid IoT pipeline combining deployed Fog/Edge nodes for local data processing with a comprehensive AWS Cloud blueprint for scalable ingestion and ML analytics.

11/2025 – 12/2025

FloraSense: Smart Indoor Plant System 
Engineered an automated IoT monitoring system using Raspberry Pi and Python, featuring filtered sensor data processing, threshold-triggered irrigation, and real-time Telegram alerts.

04/2025 – 05/2025

EXTRACURRICULAR ACTIVITIES

Cybersecurity Content Creator & Technical Facilitator
Cybersecurity Club @ PNU

- Developed educational content on cyber threats and mitigation strategies.
- Facilitated interactive Ruby-based coding sessions to simplify programming fundamentals.

08/2024 – 05/2025
Riyadh, Saudi Arabia

SKILLS

Programming & Databases: Python, C++, Java, SQL.
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn.
Hardware & Electronics: Circuit design, sensor integration, Arduino Uno, Raspberry Pi.
Engineering & Simulation Tools: MATLAB Simulink, Cisco Packet Tracer, Wokwi, Google Colab.

CERTIFICATES

CompTIA Security+: August 2026
Cisco Networking Academy CCNA (Academic Course): December 2024

LANGUAGES

Arabic: Native, **English:** B2
